

## HD-105 and HD-120 Front Basket Installation Guide

Each basket comes with separate legs, handlebar fitting clamps, bolts and screws. Legs and clamps must be attached before attaching the basket.

1. Attach the legs of the basket together with the fender bracket legs to the fork using the screws supplied (see the picture below). Make sure the fender bracket is on the outside. **DO NOT ATTACH THE BASKET AT THIS TIME, ONLY THE LEGS.** Do not tighten the screws yet.

2. Attach the basket clamps to the handlebar as shown in the picture below. You do not need the horizontal bracket supplied with basket hardware. This bracket is used on bicycles with a short handlebar span.

3. Attach the basket to the legs and handlebar clamp fittings as shown in the picture and tighten the screws.

NOTE: This basket is designed to fit different make and models of bicycles. Installation may vary depending on the fork and handlebar style and size. This guide may not be applicable to bicycles made by others.
