

HUSKY BICYCLES LLC

INSTALLATION GUIDE

PEDALS

WARNING:

To prevent accidental injury, pedals must be secured to the crank arms at all times.

A 15mm pedal wrench or a thin open-end wrench is needed. Some pedals require 9/16" wrench.

Before installing, identify the right-hand and left-hand pedals. Pedal spindles are stamped "R" and "L" to help with identification.

Right-hand pedal must be attached to right crank arm as pictured and is secured by tightening **clock-wise**.

Left-hand pedal is tightened **counter-clockwise**.
